

Mobile Account Management

Freedom Mobile uses account aggregation to keep you connected to your financial accounts. Almost anything you do with your financial institution's browser-based online banking, you can accomplish using Freedom Mobile.

- Deposit checks

Your institution must provide remote deposit capture services for this feature to be available.

- Transfer funds
- Set alerts and reminders

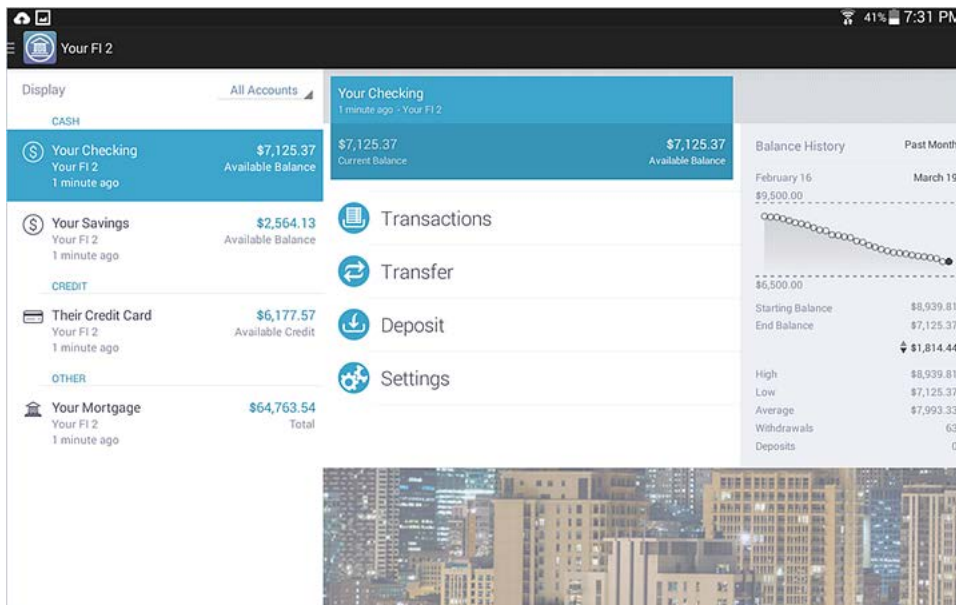

Viewing Account Information

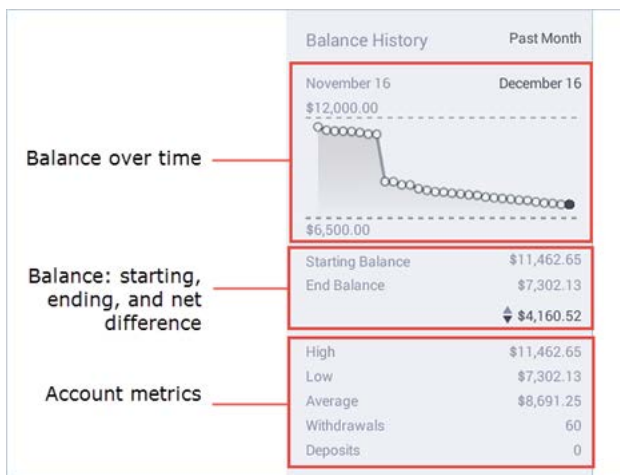

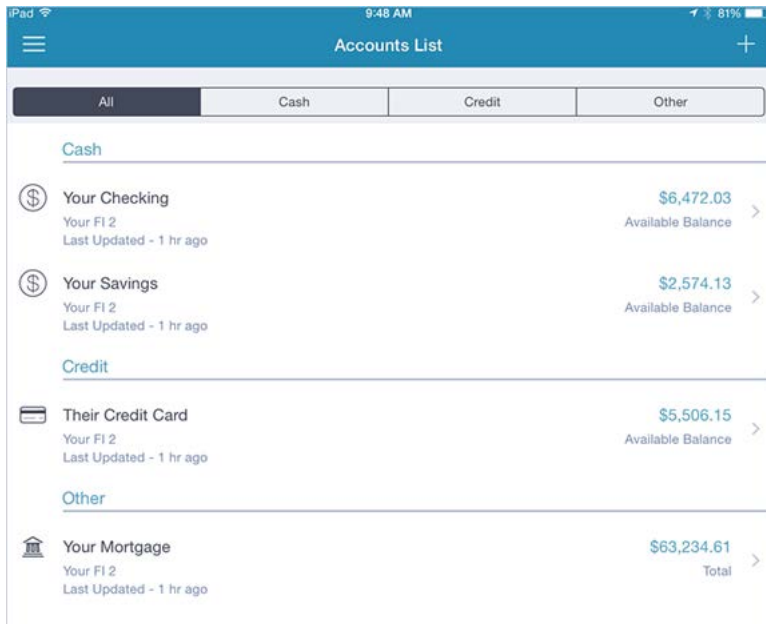

Get account statistics at a glance, including your current, highest, lowest, or average balance, or use handy actions like transactions, transfers, deposits, and settings.

1. Tap the menu, and then tap **Accounts**.
2. Tap an account on the left-hand side for quick actions and to view balance history information for that account.

Try filtering by account type. If iOS, tap **Cash**, **Credit**, or **Other** to filter your account list. If Android™, tap **All Accounts** to access filtering options.

New Financial Accounts

If you open a new account with your financial institution, the account information automatically appears in the app!

Open a new account through your financial institution. You'll see your new account in Freedom Mobile with your other accounts.

Sorry, but you cannot open new accounts from the Freedom Mobile app.
